

Senior GIS/Java Developer – Rockville, MD (\$85-95k)

Job Description

Our research based client is looking for a Senior Java Developer with substantial experience in two out of three of the following areas: (1) software agents (distributed and concurrent programming with message passing); (2) GIS (server side); and (3) ontologies. A master's degree in computer science, engineering or a related field is required. US citizenship is required.

Job Duties

- 1) Develop plug-ins to GeoServer that utilize ontology information
- 2) Develop ontology information for specific application (to be discussed at interview) and software to allow for access via GeoServer
- 3) Develop computational geometry code to support queries
